Christmas Tree Safety

As you deck the halls this holiday season, be fire smart. A small fire that spreads to a Christmas tree can grow large very quickly.

- PICKING THE TREE**
 - ❗ Choose a tree with fresh, green needles that do not fall off when touched.
- PLACING THE TREE**
 - ❗ Before placing the tree in the stand, cut 2" from the base of the trunk.
 - ❗ Make sure the tree is at least three feet away from any heat source, like fireplaces, radiators, candles, heat vents or lights.
 - ❗ Make sure the tree is not blocking an exit.
 - ❗ Add water to the tree stand. Be sure to add water daily.
- LIGHTING THE TREE**
 - ❗ Use lights that have the label of a recognized testing laboratory. Some lights are only for indoor or outdoor use.
 - ❗ Replace any string of lights with worn or broken cords or loose bulb connections. Read manufacturer's instructions for number of light strands to connect.
 - ❗ Never use lit candles to decorate the tree.
 - ❗ Always turn off Christmas tree lights before leaving home or going to bed.

After Christmas

Get rid of the tree after Christmas or when it is dry. Dried-out trees are a fire danger and should not be left in the home or garage, or placed outside against the home. Check with your local community to find a recycling program. Bring outdoor electrical lights inside after the holidays to prevent hazards and make them last longer.
