

Uxbridge Downtown Flood Reduction Municipal Class Environmental Assessment

NOTICE OF PUBLIC INFORMATION CENTRE

PUBLIC WORKS DEPARTMENT

PUBLIC NOTICE

Issued: June 23, 2016

The Township of Uxbridge is holding a Public Information Centre to invite comments and consultation on proposed changes to the previously-identified solution for reducing flood risk in the downtown Uxbridge area.

The date, time and location of the PIC are as follows:

Date: **Tuesday, July 5, 2016**

Time: **6:30 – 8:30 p.m. (open house drop-in)**

Location: **Township of Uxbridge Municipal Office,
51 Toronto Street South, Uxbridge**

In 2012, the Township of Uxbridge (Township) completed a Municipal Class Environmental Assessment (EA) to evaluate alternative solutions for reducing flood risk in the downtown Uxbridge area. The project also considered options for replacing a 200 meter long deteriorated section of culvert conveying Uxbridge Brook underneath Brock Street (see map).

The recommended concept, consisting of a twin culvert replacement in combination with downstream improvements, was modified in 2015 to eliminate a proposed section of open channel.

The Township of Uxbridge is now considering additional changes to the recommended concept, including altering the span and alignment of the twin culvert. The downstream improvements concept remains unchanged.

In accordance with the Municipal Class EA process, the Township will be evaluating the revised concept, including any implications on the environment, and documenting the outcome from the review in a second Addendum to the original Environmental Study Report (2012). The Township will issue a further notification when the Addendum is made available for public review, emphasizing that only the proposed changes to the recommended concept are open for consultation.

If you have comments or questions, require further information about the Municipal Class EA and/or Addendum to the Environmental Study Report, or you wish to be included in our stakeholder list, please contact either one of the following project team members:

GHD Ltd

Ian Dobrindt, MCIP, RPP, EP
